

## IN THE CLAIMS

Please cancel claims 1-20 and add new claims 21-35.

Claims 1-20 (cancelled)

21. A stabilizer holder for hand held cameras comprising:

a first elongated frame member having a normally vertical orientation, a distal end and a proximal end, a normally vertical hand grip mounted at said proximal end and a pivot mount having at least a first normally horizontal pivot axis B;

a second frame pivotally mounted to said first frame at said pivot mount for freely pivoting about said horizontal axis; and

a camera mount on said second frame disposed below said pivot axis for mounting a camera so that the combined center of gravity of said camera and said second frame are disposed below said horizontal pivot axis.

22. A stabilizer holder according to claim 1 wherein said pivot mount has a second pivot axis orthogonal to said first axis and said second frame pivots about said first and second orthogonal axes.

23. A stabilizer holder according to claim 1 wherein said pivot mount is normally disposed directly above said hand grip in operation.

24. A stabilizer holder according to claim 1 wherein said second frame is a four bar linkage that maintains a camera in a normally uniform horizontal orientation when pivoting about said first axis.

25. A stabilizer holder according to claim 24 wherein said pivot mount has a second pivot axis orthogonal to said first axis and said second frame pivots about said first and second orthogonal axes.

26. A stabilizer holder according to claim 1 wherein said hand grip is mounted on said lower arm in substantial axial alignment with said pivot mount.

27. A stabilizer holder according to claim 1 wherein said second frame is an elongated arm extending at a right angle to said pivot axis.

28. A stabilizer holder according to claim 26 wherein said second frame normally extends horizontally when a camera is mounted on an outer end thereof.

29. A hand held stabilizer holder for hand held cameras comprising:

an elongated first frame having a normally vertical orientation and a generally C configuration with an upper arm and a lower arm normally extending horizontally, a pivot mount having at least a normally horizontal first pivot axis on said an outer end of said upper arm and a normally vertical hand grip mounted on said lower arm;

a second frame pivotally mounted to said first frame at said pivot mount to freely pivot about said first axis; and

a camera mount on said second frame disposed to position a camera below said pivot mount so that the combined weight of said camera and said second frame is below said first pivot axis.

30. A stabilizer holder according to claim 29 wherein said pivot mount includes a second axis orthogonal to said first axis and said second frame is pivotally mounted to pivot about said first axis and said second axis.

31. A stabilizer holder according to claim 29 wherein said second frame is a four bar linkage that maintains a camera in a normally uniform horizontal orientation when said second frame is pivoting about said first axis.

32. A stabilizer holder according to claim 31 wherein said pivot mount includes a second axis orthogonal to said first axis and said second frame is pivotally mounted to pivot about said first axis and said second axis.

33. A stabilizer holder according to claim 31 wherein said second frame comprises a pair of generally C shaped linkage members disposed generally vertically and pivotally mounted to an upper bar forming said pivot mount and a lower bar defining a camera mount.

34. A stabilizer holder according to claim 33 wherein said pivot mount includes first and second pivots configured to pivot about orthogonal axes.

#### REMARKS

Claims 1-20 have been cancelled.

New claims 21-35 have been added and appear herein for consideration.

Reconsideration in view of the present amendment is respectfully solicited.
